VITAMIN

01

According to market feedback, two domestic manufacturers of vitamin A and vitamin E have notified their customers internally to stop supplying them, and all contracts that had not been signed before the suspension will be suspended.

AMINO ACID

02

Recently, the quotations of 98% lysine are stable, but the spot supply in the domestic market is very tight. Previously, there were many orders from end users. The factory is currently focusing on shipments. The export price is between USD1395-1435/MT. We will pay attention to the progress of market order signing in the future. It is expected that the market of 98% lysine will be stable in the short term.

API

03

Recently, Sinovac Pharmaceuticals and Sichuan Kelun Pharmaceutical Co., Ltd. signed a cooperation agreement, and the two parties reached a strategic cooperation on the overseas expansion of Kelun Pharmaceutical's high-end generic drugs and innovative drugs. According to the cooperation agreement, Kelun Pharmaceuticals provides a list of approved and under-development products that can be cooperated, covering multiple therapeutic areas. Sinovac Pharmaceuticals will screen products that can be cooperated, and then sign separate project cooperation agreements for specific products. The two parties will use their respective advantages in R&D, production and commercialization to jointly promote the registration, listing and sales of these products in the global market.

FOOD ADDITIVE

04

Recently, affected by market conditions and raw materials, the prices of carnitine products have stabilized.

Carnitine Base: mainstream manufacturers' quotation range: USD19.7-20.9/KG;

L-carnitine hydrochloride: mainstream manufacturers' quotation range: USD21.6-22.8/KG;

L-carnitine tartrate: mainstream manufacturers' quotation range: USD18.5-19.7/KG.

Short-term prices are expected to rise, and we will continue to pay attention to market conditions.
